PART II.

NOTICE.

ALL BIDS ARE CONSIDERED AS BEING FOR ENTIRE LOT AND NOT PER COIN. This is now the universal custom at all stamp and some book sales and greatly simplifies the billing.

No charge is made for buying but purchasers must pay all shipping expenses.

NO RETURN OF ANY LOTS PERMITTED FOR ANY REASON WHATEVER. If not willing to comply with this, don't bid. If any great inaccuracy should be discovered, the claim will be allowed but the cataloguer reserves the right to be the sole judge of all claims and, under no circumstance, will any claim be entertained for any difference of opinion as to condition.

All coins are usually guaranteed without limit of time and on all U. S. coins or other modern coinage, the unlimited guarantee still holds good. The ancient coins of this sale have been catalogued very carefully and every effort will be made before and during the sale to eliminate any doubtful or bogus specimens, but the cataloguer does not claim to be infallible and should anything slip through undetected any claim must be made as soon as possible after receipt of coins that it can be adjusted before settlement is made with owners at the expiration of 30 days from sale.

All sizes given are in American scale, sixteenths of an inch. This is the scale of the U. S. Mint and only rational and easily understood method for an American coin sale.

CHINESE COPPER AND BRASS COINS.

ANCIENT GREEK COINS.

As the Greek silver coins follow different monetary standards, with varying weights, it has been deemed best to divide them into Tetradrachms, Didrachms, Drachms, etc., of the average weight. While this may not be, in all cases, a strictly correct nomenclature, it will serve to identify them without confusion. Special care has been taken not only to properly attribute but also to prevent the inclusion of any doubtful or bogus specimens.

From the time of Augustus down to 300 A.D., a long series of the different Emperors with Greek inscriptions was minted here. Mr. Appleton started to catalogue them but gave it up after describing 36 of them. The first 100 are of the earlier period and of the flat type, including some 40 of the base potin Tetradrachms; while the balance are of the thick clumpy shape that the later Emperors issued. The designs are varied and include elephant quadriga, hippopotamus, etc. Among so large a number there must be some rarities and the collection would be very valuable to a Greek student who would spend the time needed to attribute. All conditions but including some very good pieces. Bronze, except about 50 in potin. 259 pcs.

Mr. Appleton's collection of the denarii of the families of the Roman Republic is so extensive that it should not be separated and it is therefore thought best to offer intact.
